

Gold Belt Ninja Guide

Activity 06: Going Gold Phase

Going Gold Phase

Congratulations on making it to the Going Gold Phase! You should feel very proud of all your accomplishments and all the progress you have made up to this point, and are hopefully looking forward to sharing your finished project with others!

Once your project is accepted by the Education Team, it has “gone gold” and is ready to be featured on the Gold Belt Ninjas site. In order to do this, you’ll need to work with your Code Sensei to submit the Gold Belt Project Going Gold Form to the Code Ninjas Education Team.

To complete the Going Gold Submission Form, you will need:

- A short **description** of yourself, your project, and your process for developing it.
- A **photo** of yourself, to be displayed on the Gold Belt Ninjas site.
- An optional **video** that describes your project and your process, from idea to completion. This can be created from a compilation of your Dev Diaries, or can be made separately.
- An action **screenshot** of your project, to be displayed on the Gold Belt Ninjas site.
- An updated **WebGL link from GitHub**, to share your project.

Ninja Planning Document

Complete the **Going Gold Phase – Publishing** portion of your Gold Belt Ninja Planning Document by drafting information to be posted alongside your project on the Black Belt Ninjas site.

After compiling everything you need, work with your Code Sensei to submit your project using the Gold Belt Project Going Gold Form.

Congratulations on earning your Gold Belt!
